

Document title: HasselHolms General terms Allmänna villkor	Responsible: Ingvar Holmström
Rev. No. 1	Last revised: 2009-04-11

Unless otherwise agreed, HassleHolm only supplies grinding services according to the Grinding Products listed by the company.

This means, for example, that incidental work such as disposal of chips, sowing/planting, refilling soil or planting new trees is not included in our obligation.

Further, the purchaser is responsible for marking pipes/cable where necessary, as well as informing our grind technician about these. This is particularly important during deep grinding and extensive grinding.

Where necessary, the purchaser will expose pipes or cables in sensitive areas.

The purchaser is responsible for all appropriate permits, as required, as well as securing the work area, (for example, city parking areas that must be closed).

In general, we presume non-limited working hours.

On larger construction sites, we assume that we will work under the purchaser's work-environment plan.

We assume that we will be provided with details concerning the work environment plan in order to ensure that our project can be performed practically.

Work on roads and rights of way requires that we work under the purchaser's traffic planning and engineering permits.

#### **Pricing:**

See information under Pricing on our homepage.

All prices given in local currencies, excluding tax and VAT.

#### **Quality and Environmental Assurance:**

-HasselHolm is not certified, but does work actively with a quality assurance system to guide us in order to ensure that all of our organization's activities fulfill specific demands.

-We have been developing and implementing technology and safety and the environment for our own machinery for many years; most of our equipment meets or exceeds today's environmental standards.

-All of our grind engineers have taken the Swedish Road Administraton's professional road safety course here in Sweden and are very knowledgeable of the safety demands that we have in place when performing grinding jobs.
